Geography

1. **The exact time taken by the earth for single rotation on its own axis is :**
   A 24 hrs
   B 24 hrs 30 ms
   C 23 hrs 54 minutes 7.8 sec
   D 23 hrs 56 minutes 4.09 sec [1]
2. **Foucault experiment is proof of which one of the following ?**
   A Revolution of sun
   B Revolution of moon
   C Rotation of Earth
   D Revolution of Earth [1]
3. **The speed of rotation of the earth is the highest**
   A along the Equator
   B at the North-Pole
   C along the Tropic of Cancer
   D along the Arctic Circle [1]
4. **The two 'equinoxes' take place respectively in the months of**
   A January and June
   B July and December
   C March and September
   D September and December [1]
5. **The points in the ecliptic farthest north and south of the celestial equator are called**
   A summer and winter solstices
   B autumnal and vernal equinox
   C north celestial pole and south celestial pole [1]
   D None of the above

SAMPLE 1

ENTRANCE EXAM IN HISTORY, GEOGRAPHY & SOCIOLOGY
III YEAR

6. The erosional topographical features are formed through
A Exogenic processes
B Endogenic processes
C Hypogene processes
D None of them [1]

7. Which of the following is a post volcanic activity ?
A Lava ejection
B Earthquakes
C Thermal spring formation
D All of these [1]

8. What causes an Earthquake ?
A Frequent occurence of cyclones
B Movement of plates of earth, which float on the hot volcanic mantle below the Earth's surface
C Underground nuclear explosions
D Drilling of crude oil [1]

9. A hole in Earth's crust through which magma comes to Earth's surface is known as
A Crater
B Vent
C Cone
D Pipe [1]

10. Vibrations radiate from focus in all direction as
A Seismic waves
B Transverse waves
C Longitudinal waves
D None of the above [1]

11. Instrument used to measure earthquake is known as
A seismograph
B quake meter
C barometer
D none of the above [1]

12. **The latitudinal differences in pressure delineate a number of major pressure zones, which** correspond with
A zones of climate
B zones of oceans
C zones of land
D zones of cyclonic depressions [1]

13. The monsoon climatic regions are
A South-east Asia including Australia, Africa, America
B Europe and South America
C Asia, Africa and Antarctica
D None of the above [1]

14. The smallest annual temperature range occurs in the
A equatorial tropical climate zone

B subtropical climate zone
C temperate climate zone
D polar climate zone [1]

15. The tropical cyclones do not occur to the equator because of
A weak coriolis force
B light and variable width
C excessive humidity
D connective activity [1]

16. Ozone is found in
A Mesosphere
B Ozonosphere
C Troposphere
D Stratosphere [1]

17. What causes smog ?
A due water pollution
B due to Earth's heat
C due to air pollution
D none of these [1]

18. Ozone-hole in the atmosphere is largely caused by the presence of :
A Oxygen
B Hydrogen
C Chloro-floro-carbon
D Radio-active waste [1]

19. The climatic zones are classified on the basis of
A distance from the equator
B elevation
C rainfall
D distance from the sea [1]

20. Eucalyptus constitutes the dominant part of
A Mediterranean Biome
B Temperate Grassland Biome
C Australian Biome
D California Biome [1]

21. The term territorial water means
A The water secured from other countries
B The water found within the country in form of rivers and lakes
C Water of the sea located close to the coast of a country
D The water which is supplied to other countries [1]

22. The Grand Canyon is located on the :
A Niger River
B Tapti River
C Rhine River
D Colorado River [1]

SAMPLE 1

ENTRANCE EXAM IN HISTORY, GEOGRAPHY & SOCIOLOGY
III YEAR

23. The periodic rise and fall of the sea level on the earth, gives rise to tides. This is related to

A the position of the moon with reference to the earth and the gravitational pull exerted mainly by the moon and partly by the sun

B infrared rays from the sun

C ultraviolet rays from the sun

D None of the above [1]

24. The mountains which come into being after the continental drift started, with the break up of the large land mass of pangola are

A young mountains

B old mountains

C volcanic mountains

D fold mountains [1]

25. The region of three W's that is wheat, wool and wine is

A mediterranean climatic regions

B china type climatic regions

C steppe type climatic regions

D equatorial regions [1]

Sociology

1. Which statement best describes democracy?
